However, depending on the organizational requirements, the employee may be transferred or posted to any other office location of the Company.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Role Overview</b>        | We are looking for a Full-Stack .NET Developer responsible for designing, developing, integrating, and maintaining secure, scalable, and high-performance web applications for e-Governance and large enterprise projects. The role involves hands-on development using C#, ASP.NET/.NET Core, .NET 8+, Web API, Angular/React, databases, and Microservices, along with participation in the complete software development lifecycle. The candidate will also contribute to application modernization, security and compliance, system integration, performance optimization, deployment, and production support while collaborating with cross-functional teams.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Key Responsibilities</b> | <ul style="list-style-type: none"> <li>&gt; Design, develop, enhance and maintain web-based applications using ASP.NET / .NET Core, C#, Web API and modern front-end technologies.</li> <li>&gt; Develop scalable and secure full-stack applications for e-Governance and enterprise projects handled by (n)Code Solutions.</li> <li>&gt; Work with Angular/React, HTML, CSS, JavaScript/TypeScript and responsive UI development.</li> <li>&gt; Develop and integrate RESTful APIs and third-party services with enterprise applications.</li> <li>&gt; Work with MS SQL Server/PostgreSQL/MySQL, including database design, queries, stored procedures and performance optimization.</li> <li>&gt; Follow Microservices, API-first, secure coding and software development best practices.</li> <li>&gt; Participate in requirement analysis, technical design, coding, unit testing, debugging, deployment and production support.</li> <li>&gt; Collaborate with Business Analysts, Project Managers, UI/UX, QA, DevOps and DBA teams for end-to-end project delivery.</li> <li>&gt; Ensure application security, performance, scalability, maintainability and coding standards.</li> <li>&gt; Contribute to modernization of legacy applications and migration towards .NET Core/.NET 8+ and Microservices architecture</li> </ul> |

|                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
