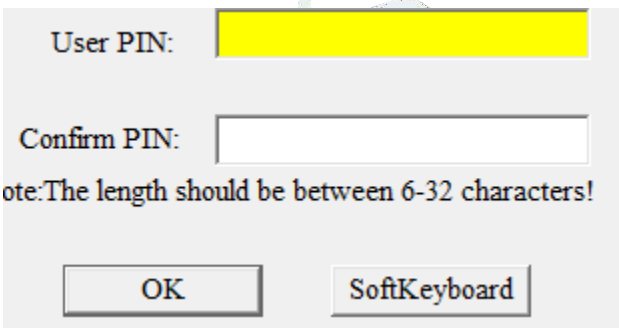
PROXKey Watchdata

- **How to set PIN**

1. When you plug WD PROXKey token you will see as per screen shot, asking for set token password

2. You have to change token default password to new password 12345678



3. Once the password change process is successfully completed, they will not receive a pop-up message prompting them to change their password again.

4. Clarify that regular password changes are still encouraged to enhance security, but users will not receive the pop-up reminder after the initial password change.
